Lesson 10

1	The Tokyo Skytree is now the tallest tower in the world.
	The entire structure, including its foundation, lighting, painting and elevators, is said to be the fruit of Japan's latest technology.
	It was completed in February 2012 and opened to the public in May 2012.
	People are queuing to enjoy visiting this broadcasting tower with observation floors and restaurants.
	Besides its major role in transmitting digital terrestrial broadcasting, it is also expected to serve as a tower with a disaster-prevention function at times of natural disaster.
